

Summary of 2013 Work Activities

Work activities began in September and progressed until mid-December. At the end of 2013 the following has been accomplished:

- Construction of the new Lillooet River Forest Service Road alignment at Truckwash Creek. Road work is nearly complete with the bridge installation remaining, scheduled for 2014
- Clearing of the Transmission Line right-of-way from the Upper Lillooet River Hydroelectric Facility powerhouse east to North Creek
- Clearing of timber at the future Upper Lillooet River HEF and Boulder Creek HEF powerhouses
- Geotechnical investigations at both powerhouse locations and the Upper Lillooet River Hydroelectric Facility intake.

Planned Work Activities for 2014

Work activity is expected to start up again in late-March or early-April 2014. Some of activities planned for 2014 include:

- Mobilization and installation of the Construction Camp
- Upgrade of transmission line access roads
- Civil works and tunnelling works at both facilities
- Transmission line completed between the hydroelectric facilities and South Creek
